**NOTICE TO BIDDERS
ADDENDUM #002**

TO THE BID FOR: B023-24 – IT Wiring at the Meriden Public Library

FOR: City of Meriden, IT Department

BID DUE DATE: December 6, 2022 @ 11:00 AM

Please acknowledge receipt of all addenda on the Proposal Pages.

The purpose of this addendum is to provide answers to the following questions.

Question #001:

CAT6 Cable – Is the cable PVC or Plenum rated?

Answer:

PVC unless Plenum is required per building code.

Question #002:

The existing wall cabinet on the wall now, can that be used for new wiring? If not please provide a manufacturer and Part# of what you are looking for. The technical notes mention a lockable rack with all four sides accessible. Can not lock an open rack? Or this would mean a lockable server type cabinet? The cost differences are significant without a Part #. Please provide.

Answer #002:

Please refer to the attached specification. This product is recommended or it's approved equal.

Bid Opening - Weather permitting, bids will be opened in the courtyard outside the Main Entrance of City Hall at 11:00 AM. In the event of inclement weather, bids will be opened in Council Chambers. **Social distancing must be maintained.**

At this time the City does not have the infrastructure to accept electronic bids and therefore bids will only be accepted as directed in the bid documents.

Please check the City of Meriden and State of Connecticut Department of Administrative Services Website often for updates. Due to the COVID19 virus, the schedule may need to be changed again because of the uncertainty of the current situation.

Standard-Depth 55U Server Cabinet Accommodates 19 in. Rack Equipment

This SmartRack 55U rack enclosure is designed for network wiring closets, retail locations, classrooms, back offices and other areas with essential rack-mount IT equipment. Constructed from heavy-duty steel with a durable black powder-coated finish, the SR55UB has a maximum stationary load capacity of 3000 pounds (1363 kilograms) and a maximum rolling load capacity of 2250 pounds (1022 kilograms).

Exceptional 55U Height Lets You Make the Best Use of Valuable Floor Space

The extra height allows you to stack more equipment vertically and make optimal use of available floor space. This 55U rack cabinet has a footprint of 24 inches (600 millimeters) wide and 43 inches (1092 millimeters) deep.

Keeps Important Equipment Secure

The reversible front door, split rear doors and half-size side panels lock securely to help prevent damage, tampering or theft. The doors, side panels and top panel are designed for quick release, making it easy to access connected equipment and cabling with little effort. Convenient top access ports and an open bottom allow easy cable routing through the cabinet. The vented doors allow generous airflow (more than 65% open space) from front to rear to keep your equipment cool and functioning at their peak.

Easy Enclosure and Equipment Installation

This 55U server rack comes fully assembled for quick and easy deployment with pre-installed (and removable) casters that let you maneuver it over a level, smooth, stable surface and through a standard seven-foot (2.1-meter) doorway into position, where it can be stabilized by adjusting the levelers (also removable). Front and rear mounting rails accept standard rack equipment up to 37 inches (940 millimeters) deep. Toolless OU mounting rails allow quick installation of up to four compatible PDUs and vertical cable managers.

Designed for Baying Multiple Enclosures in a Row

Built-in baying tabs allow the combination of two or more rack cabinets in a row. Center-to-center width can be set at 24 inches (600 millimeters) to match standard data center floor tiles.

Meets Payment Card Industry Standards

The SR55UB provides physical equipment and media security required for PCI DSS (Payment Card Industry Data Security Standard) compliance. This is essential for companies that process, store and/or transmit credit card information.
