About Health Equity Solutions

Vision

For every Connecticut resident to obtain optimal health regardless of race ethnicity, or socioeconomic status.

Mission

To promote policies, programs, and practices that result in equitable health care access, delivery, and outcomes for people in Connecticut.

Health Equity Awareness Building Workshop

This interactive workshop will cover the fundamentals of improving the health of marginalized communities. We will introduce the concept of health equity within the context of Connecticut and Meriden while exploring the reasons why low-income residents and people of color have shorter life expectancies and worse health outcomes than their wealthy counterparts. We'll discuss concrete steps for applying a health equity lens to the work we do, reinforcing the idea that anyone can increase equity from where they sit.

Please join Health Equity Solutions and the Meriden Department of Health and Human Services to learn more about the impactful role that health equity and advocacy play in the field of public health and the work we are trying to accomplish in our communities.
