HUBBARD PARK
ATTENDANCE MANAGEMENT

The City of Meriden will institute a new attendance management procedure for peak visitation times this spring at Hubbard Park. Parks Division employees will be monitoring the number of vehicles within the park proper. Once vehicle capacity has been reached, the lower West Main Street entrance will be closed, and a queue established at the upper West Main Street entrance to only permit entry with corresponding vehicle exit of the park. Managing the queue will be a joint effort of the division and the Police Department. The queue will be stopped as soon as vehicle attendance dictates & both entrances will be opened in their normal manner. The City anticipates this system being in effect for warm-weather days, especially those that fall on weekends. Please also note that parking on the **eastern (northbound traffic) sides of Spruce Street & Barberry Lane** will be prohibited during this time as well for safety reasons. Other nearby streets may be subjected to the same restrictions if warranted.

All visitors to Hubbard Park are expected to continue complying with social/physical distancing protocol until further notice.

Thank you for your continued cooperation understanding!
